Remarks Production for four 24 hour periods after 1st. 14 hrs. (well flowed by heads)
is as follows: 170 bbls.; 140 bbls.; 73 bbls., and 138 bbls. After deepening there was a
possible increase in oil from 3850'-3863', since the well after being put back on the pump
produced 66 bbls. on the 17th of May, 1941 and 64 on the 18th, which was an increase over
the settled production before it was deepened.
